HIGHLIGHTS

· **3+ years** of academic and industrial expertise in developing large-scale **deep learning research infrastructure**, with a focus on areas such as *Large Language Modeling*, *Reinforcement Learning*, and *Computer Vision*.

· **3+ years** of work experience as **Software Engineer**, **Data Scientist**, and **Team Leader** – e.g., user-centric ML, high-throughput streaming microservices, gigantic image datasets.

· **Proud of switching gears** – pun intended: coming from a Mechanical Engineering background, I decided to not settle for anything less than following my true passion, robotics. RL just happened to be a recently popularized means to this end.
